

Interdisciplinary Program in Healthcare Innovation

I³h

February - March 2020

Almost **120 students** graduated from the 5th edition of our **interfaculty** and **interuniversity** program.

Through **blended learning** they gained an insight into the interdisciplinary skills needed to translate scientific research into innovative healthcare technologies.

The 2020 edition was attended by students of various levels of medical expertise and from **diverse backgrounds**.

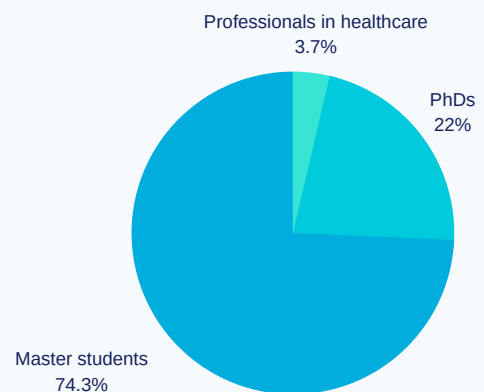

- Medicine
- Pharmacy
- Biomedical Sciences
- Engineering
- Economy and management
- Information and Communication technology

Participants represented **all major Belgian universities**.

Positive feedback shows that:

- Graduates gained necessary **competencies** to address scientific, business and social issues of modern medical care.
- Program was an **added value towards their professional development**.

- **Lectures**
- **Workshops**
- **Online conference - debate**

Diversity and expertise of lecturers was highly praised
