Interdisciplinary Program in Healthcare Innovation

**Our aim
is to help students:**

**Understand the roles
of each healthcare
stakeholder**

**Gain interdisciplinary skills
to address scientific, business
and social aspects of modern
medical care**

**Face future transformations
of medicine and healthcare
systems**

**Interact with the various
healthcare stakeholders**

Interdisciplinary Program in Healthcare Innovation

University partners

In the first edition (2016) of the Interdisciplinary Program, student participants came from just two universities.

In the 9th edition (2024), we were proud to welcome students from **10 different universities.**

Interdisciplinary by nature, we welcome students from various background

RECOGNITION

Participants are given the opportunity to **choose between two tracks: ECTS or Certificate track**

All students are expected to attend:

1 on-site Opening session

lectures, debates & chance to interact with healthcare leaders

3 sessions of online lectures and debates

on challenges and future transformations of medicine and healthcare system

1 on-site Closing session :

lectures & debates

How to pass the ECTS track ? (3 or 5 ECTS depending on university)

- **80% attendance**
- Successfully pass the **MCQ exam**
- (Opportunity to follow the workshops as an optional learning experience)

How to obtain the Certificate in Innovation in healthcare in addition to the ECTS?

- **80% attendance**
- Successfully pass the **MCQ exam**
- **2 workshops** on patient data/GDPR and negotiation skills
- Defense of a **group case study**: (10p. dissertation)
